Lenny

I thought that in the 5/17 presentation, you received the preliminaries for the pH tests (Method 1313) but were awaiting the QA/QC results which would be forthcoming sometime in June. I assume the column LEAF test is the second test (Method 1314) they were performing. As I read your email, instead of the final pH results for the LEAF test coming in June, it is being pushed back, at the very least, to early to mid July when you will be receiving the completed QA/QC LEAF results for both Methods 1313 and 1314 at the earliest?

spoke to susan thorneloe this morning - we should have preliminary results for the column leaf test on 7/9. not sure when the validated data for either test will be available. i'll ask when i speak to susan again, which will be the week after next, as she's away on business.

Lenny thanks for the additional pictures you sent. Do either of you have any idea when the QA/QC LEAF results will be made available to us?
